

LECTURES ON HODGE THEORY AND ALGEBRAIC CYCLES

TERRY GANNON

ABSTRACT. Syllabus for a PIMS course. Notes provided by James D. Lewis

CONTENTS

1. Preface	2
2. Prerequisite reading material	2
3. Outline of lecture notes and preliminary material	3
3.1. Motivation	3
3.5. Notation	7
3.6. Some Hodge theory	7
3.10. Formalism of mixed Hodge structures	8
3.23. Algebraic cycles (classical)	10
4. Cohomological machinery	12
4.1. A primer on spectral sequences	12
4.5. Double complexes and the Grothendieck spectral sequences	14
4.8. Hypercohomology	16
4.13. Kähler differentials and arithmetic de Rham cohomology	19
4.16. Arithmetic Gauss-Manin connection	20
4.17. Geometric Gauss-Manin connection	21
4.18. The arithmetic cycle class map	21
4.19. De Rham and Mumford-Griffiths invariants	22
4.22. Appendix: Milnor K -theory	23
5. Deligne cohomology	25
5.1. Deligne cohomology I	25
5.9. Real Deligne cohomology I	27
5.10. Deligne-Beilinson cohomology, II	28
5.17. Real Deligne cohomology II	31
6. Cycle class maps	33
6.2. Classical case	34
6.6. Generalized cycles, I	37
6.10. Generalized cycles, II	39
6.13. Cycle class map (generic point)	40
6.18. An abridged version of the Bloch map	42
6.22. [Beilinson-] Rigidity	46
6.25. Appendix: Local to global issues	47
6.29. Appendix: Abel-Jacobi map	49
7. Examples of regulators and normal functions	50

Date: May 9, 2026.

2000 Mathematics Subject Classification. Primary: 14C35, 14C25, 19E15; Secondary: 14C30.

7.1. Case $m = 0$ and CY threefolds	50
7.6. Case $m = 1$ and $K3$ surfaces	51
7.15. Torsion indecomposables	53
7.18. Case $m = 2$ and elliptic curves	54
7.19. Constructing $K_2(X)$ classes on elliptic curves X	55
7.27. Appendix: Horizontality issues of cycle induced normal functions	61
8. Arithmetic normal functions	62
8.1. Bloch-Beilinson filtration	62
8.3. Approach via Lewis	64
8.4. (Generalized) normal functions	64
9. The Beilinson-Hodge conjectures	66
9.6. A key observation	69
9.8. Formulation of the conjectures	70
9.14. Integral formulations and the Milnor regulator	71
9.16. Key example I	72
9.19. Alternate take via a morphism of sites	73
9.20. Key example II	74
9.27. Bloch-Kato theorem and its consequences	75
References	77
